Dialysis Event Report: FAC0013

State IL | Network NW-02 | Reporting year 2024 | SYNTHETIC DATA FOR DEMONSTRATION

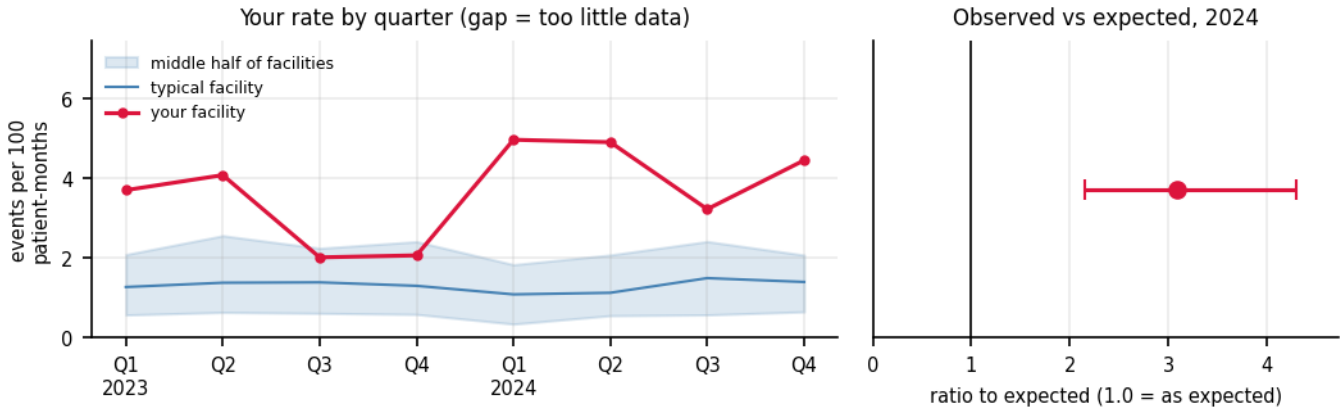

Your facility reported MORE dialysis events than we would expect.

In 2024 your facility reported 35 dialysis events. Based on your patients and the kind of vascular access they have, we would expect about 11.3. That is a ratio of 3.10, with a likely range of 2.16 to 4.31.

Your numbers

Measure	Your facility	Typical facility (middle half)
Dialysis events reported	35	
Events expected for your patients	11.3	
Ratio to expected (likely range)	3.10 (2.16 to 4.31)	1.0 means as expected
Events per 100 patient-months	4.27	1.52 (0.94 to 2.14)
Patients dialyzing with a catheter	13%	19% (median)

How you compare over time

Data quality

Score 94.5 out of 100: Good, with items to fix

- 1 month(s) submitted more than 30 days after month end
- 1 month(s) where patient counts did not add up or looked unusual
- 3 event(s) with a date or vascular access problem

What to do next

- Review your catheter care, hand hygiene, and catheter hub disinfection checks with your team (CDC Core Interventions).
- Fix the data problems listed above; they can hide real events or make your numbers look wrong.

This report is a surveillance signal, not a finding of fault or a clinical judgment. Questions? Contact your network or the NHSN help desk.
